

Shizuoka Investment Seminar for foreign Affiliates

~Information on the allures of Shizuoka~

Japan's foremost "Manufacturing Prefecture"~

For those interested in either "secondary investments in manufacturing" or the "establishment of new bases" this seminar is a must-see !

Due to its temperate climate and varied topography, Shizuoka Prefecture is chosen as a site for business expansion by a wide range of companies - particularly manufacturers - in industries related to medicine and health, food and automobiles. The prefecture offers a privileged business environment, and the number of factories and distribution centers of foreign companies is in fact among the highest within the country.

In this seminar, case studies of foreign-affiliated companies that have established a presence in Shizuoka and the industrial support measures that the prefecture offers foreign-affiliated companies and commerce groups from around the capital region will be introduced. Don't miss this opportunity for expanding your business. We look forward to welcoming you!

Welcome to Shizuoka!

✓ A convenient location with a rich natural environment

Shizuoka is located in between the metropolitan capital region and the Chukyo area and is blessed with an outstanding infrastructure environment (including expressways). Companies here operate amidst some of the most beautiful nature, as represented by the UNESCO World Heritage Site Mount Fuji, and benefit from abundant groundwater, long sunshine hours and a mild climate.

✓ The advancement of disaster prevention

Shizuoka is ahead of other prefectures in its commitment to earthquake disaster prevention measures. The coastal areas are protected by a system of levees which minimize the potential damage due to tsunamis.

✓ Active industrial innovation for the next generation

Japan's leading "Manufacturing Prefecture," Shizuoka, utilizes its many industrial advantages in order to remain active in innovation for industries such as those related to food, medicine and healthcare, and optical and electronics technology. The prefecture has also prepared an extensive support menu for companies.
